# Phoenix Zeppelin Slovakia Headquarters

Banska Bystrica

This building is located on site adjoining a four-lane road, in a rather unwelcoming and industrial part of town. Around 100 employees work in this office complex and the fabrication, concept, and design are all intended to make this an innovative and welcoming place to work. The façade give the building a solid appearance, while the perforated metal cladding acts as a sunscreen system. The exterior appearance reflects the industrial surroundings, developing a dialogue with other buildings in the area. The rather closed exterior appearance is contrasted by a glazed courtyard, which allows ample daylight into the interiors.
